

Screens for hypercasual runner app

A “hypercasual profile view platform runner” game on mobile usually has a small set of screens. Here’s a complete, practical screen list you can plan for (even if some are optional depending on your scope).

Onboarding & Authentication

- Splash / Loading
- Onboarding (welcome slides)
- Sign-in / Login (optional; many hypercasual games skip this)
- Age gate / Consent (if needed)
- Permissions prompt (notifications / etc., if you use it)

Home / Discovery

- Main Menu (hub)
- Profile View (your requested screen)
- Profile Edit (name/photo/skin selection) (optional)
- Settings
- Help / Support
- About (optional)

Gameplay (Runner Loop)

- Level Select (world / stages) (or “Roadmap”)
- Game Loading (when entering a run)
- In-Run HUD (lives/energy/coins, score, progress, etc.)
- Pause Menu (resume, restart, settings)
- Game Over
- Results / Rewards Screen (show coins, XP, unlocks, ads prompt)
- Ad-Watch Recovery (watch to continue / revive) (optional)
- Daily Challenge (entry from menu)
- Event / Limited-time mode (optional)

Progression & Economy

- Missions / Objectives
- Inventory (if you collect items)
- Shop
- In-app Purchase (IAP) screen
- Currency / Purchase Confirmation (optional)

- Rewards Vault / Claims (optional)
- Achievements (optional)

Social (Often Minimal in Hypercasual)

- Friends / Leaderboard (optional)
- Leaderboard Screen
- Share / Invite Screen (optional)

Ads (Common in Hypercasual)

- Interstitial Ad (screen trigger, not a standalone UI usually)
- Rewarded Ad (watch to double coins / continue)
- Consent/Ad preferences (if required by region)

Legal & Safety

- Privacy Policy
- Terms of Service
- Cookie/Tracking notice (if required)
- Data deletion / request flows (optional depending on laws)

System / Utility

- Connectivity issues screen (optional)
- “Graphics/Performance settings” screen (optional)
- “Device compatibility / unsupported OS” screen (rare)
